

PTFE BRAID PACKING - TYPE PF165/B

Product's category

White extruded PTFE

Characteristics

Gasket obtained by extrusion of pure non-sintered PTFE with the addition of special lubricants.

Soft and easily adaptable to each sealing seat, this gasket is chemically inert and resists all chemical products and solvents, except for alkaline materials.

Does not harden in the limit of 260 ° C, avoiding the scratches of the tree; it is unassailable by corrosive agents.

Applications

Acids and alkalis, oil, gases, solvents, steam, clean fluids, centrifugal pumps, plunger pumps, mixers, agitators, expansion joints, valves and vacuum pumps.

Suitable for the chemical industries, pharmaceutical industries and food industries.
