

Valvola a membrana metallica a 2/2 vie a comando manuale
Modello 985/987
DN 15 - DN 200 / 1/2" - 8"

2/2 way Metal Diaphragm Valve
Type 985/987
DN 15 - DN 200 / 1/2" - 8"

Costruzione

985 Azionamento con comando a volantino in plastica.

Questa valvola dal design compatto con volantino fisso presenta una finitura liscia sul perimetro del coperchio di plastica, resistente alla corrosione, che impedisce l'accumulo di sporco.

987 Azionamento con comando a volantino in metallo.

Questa valvola con volantino fisso è caratterizzata da un volantino metallico dal design robusto che si presta a diverse applicazioni ad alta temperatura, in base al materiale di cui è costituita la membrana.

Caratteristiche

- Adatta all'impiego di fluidi di processo neutri e aggressivi, liquidi e gassosi, a seconda dei materiali utilizzati per il corpo e la membrana
- Flusso bidirezionale
- Insensibile ai fluidi sporchi o contaminati
- Caratteristiche di portata eccellenti
- Tenuta ermetica
- Installabile in qualsiasi posizione
- Annulla il colpo d'ariete
- Dotata di indicatore di posizione
- Design compatto
- Volantino in materiale anticorrosivo senza manutenzione

Dati tecnici

Temperatura: modello 985 max. 95 °C (200 °F), modello 987 max. 150 °C (300 °F) a seconda del materiale del corpo e della membrana.

Construction

985 Handwheel operated actuator in plastic.

This compact designed valve with non rising Handwheel has a smooth contour finish on this plastic cover to eliminates accumulation of dirt and is corrosion resistant.

987 Handwheel operated actuator in metal.

This valve with non rising handwheel has a robust designed metal actuator which allows higher temperatures applications, depending on the diaphragm material to be used.

Features

- Process media can be neutral and aggressive liquid and gaseous, dependent upon material selection of body and diaphragm
- Flow can be in either direction
- Insensitive to dirty or contaminated media
- Excellent flow characteristics
- Bubble tight sealing
- Installation can be in any position
- Eliminates water hammer
- Complete with position indicator
- Compact construction
- Maintenance free non corrosive actuator

Technical data

Temperature: Type 985 max 95 °C (200 °F), Type 987 max 150 °C (300 °F) depending on diaphragm and body material.
